SULFAGUARD™

H_2S MITIGATION

ABOUT US

In treating for H_2S, various parameters are considered to develop the most efficient and economical treatment program.

Coastal's chemical strategy for H_2S mitigation program is designed to specifically address:

- H_2S scavenging in Gas, Oil and Multi-phase applications
- Solids generation
- New H_2S scavenger technologies

WHAT SETS US APART

TRUSTED EXPERTISE

Our Applications Engineers expertise delivers constant optimization tailored to your unique needs and goals.

HIGH PERFORMANCE EFFICIENCY

Chemistries that are fast acting and very cost effective on lower sulfur loading systems. New patented Chemistry with faster reaction kinetics with lower volatility than the standard triazine chemistries available on the market.

MONITORING AND OPTIMIZATION PROGRAMS

All field personnel consistently monitors the system parameters to increase customer savings and reduce the possibility of downtime.
